Eye Examination Report

REQUIREMENTS

All candidates and holders of NDT personnel certification shall have natural or corrected vision satisfying the following criteria:

- Corrected or uncorrected near-vision acuity shall permit reading a minimum of Times Roman N4.5 or equivalent letters (having a vertical height of not more than 1.6 mm – see note 3) at not less than 30 cm.
- Colour vision (see note 1) shall be sufficient that the candidate can distinguish contrast between the colours or shades used in the NDT method concerned as specified by the employer.

Subsequently to certification, the tests of visual acuity shall be carried out at least annually. Records of tests shall be retained by the employer or responsible agency and provided to the “CBNDT-Sri Lanka” upon request. Failure to do so will invalidate all certification.

NOTE 1. All candidates and holders of certification will be required to have had colour perception assessed by the Ishihara 24 plate test. The test is required every five years. In the event that a colour perception deficiency, indicated by misreading any of the first 17 plates, is detected during the Ishihara test, a further 'trade test' is to be carried out by the employer to ascertain whether the detected colour perception deficiency affects the individual's ability to perform the NDT for which he is certified. This trade test is to be documented and the record of the test made available to the “CBNDT-Sri Lanka” upon request.

NOTE 2. Evidence of satisfactory vision, shall be determined by an Ophthalmologist, Optometrist, physician or other medically recognized person.
